Bring Your Stories To Life

AAF Conformation Third-Party Application

Avid Media Composer

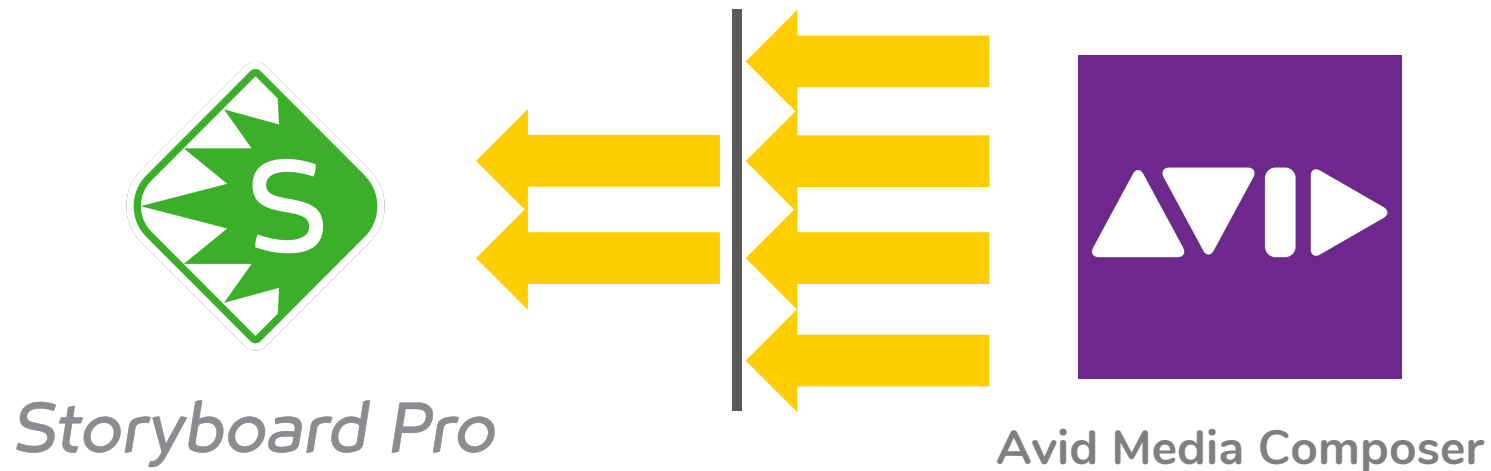

The Storyboard Pro AAF conformation is specifically optimized for AAF for Media Composer.

Media Composer doesn't follow the AAF Edit standard.

Results may vary in other applications supporting AAF.

Compatibility

- Some features from third-party applications are not supported in Storyboard Pro
- For a smooth conformation process, there are guidelines to follow

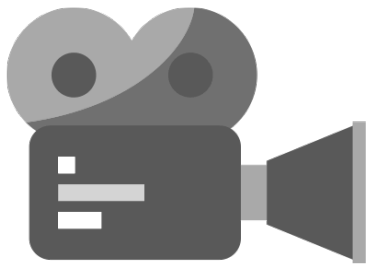

General Guidelines

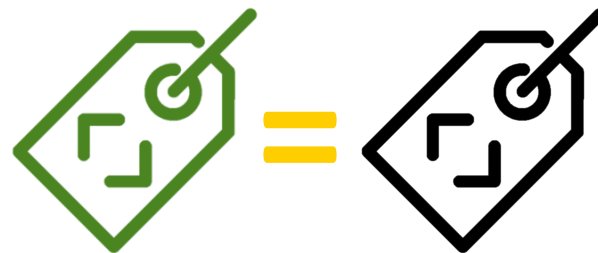

Source AAF from SBP

Identical AAF Structure

Clips on Same Video Track

Camera Motions
Using 3D Warp Effect

Identical Metadata

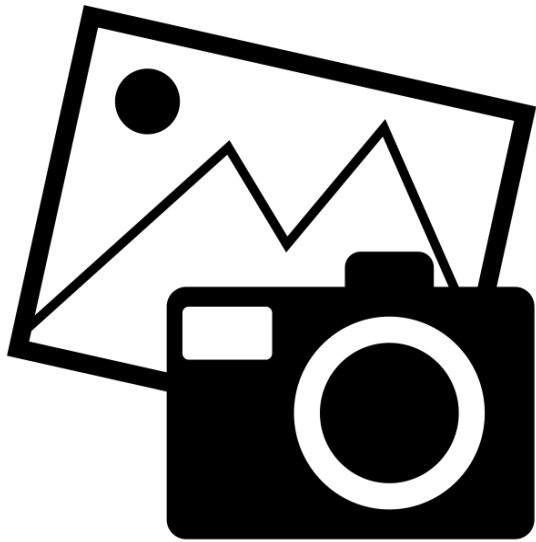

Compatible
Image Formats

Compatible

Image Import Guidelines

In Media Composer, import images using the **Import Media** option.

Do **NOT** use use the Link to Media option.

For the Image Size Adjustment option, use **Resize Image to Fit Format Raster**.

Guidelines for Transitions

Media Composer **doesn't** support all Storyboard Pro transitions.

Slide-in and Slide-out transitions are converted to dissolve transitions.

Only 12 o'clock clockwise is supported by Media Composer. All clock wipes are exported as 12 o'clock clockwise wipes.

Only horizontal, vertical, and corner wipes are supported by Media Composer. Custom angle wipes are rounded to the nearest supported wipe.
